

Mobile QA Game Tester

Hourly \$8-\$10

Opening: Immediate

Temp - Permanent

Location: Los Angeles, CA

Responsible for finding and reporting game issues, the QA Game Tester verifies that all applications are in line with company guidelines via exploratory and structured testing. QA Tester will provide vital feedback about the quality of game play and user interface during development. Ideal candidate will possess a strong attention for detail and organizational skills required to test mobile applications.

Duties/Responsibilities:

- Perform exploratory testing during application development to detect bugs and game design flaws.

- Perform operator specific pre-certification testing to ensure that applications are ready to submit.

- Report all issues to the QA Lead.

- Perform various QA duties beyond application testing. Including deck audits, handset profiling and other duties as assigned by supervisor.

Requirements/Qualifications:

- Six months experience in game Quality Assurance; previous Game Testing experience recommended.

- Previous J2ME QA Testing experience a large plus.

- Proficient in MS Word and MS Excel.

- Strong communication skills, written and verbal, accompanied by analytical problem-solving and research skills.

- Demonstrated ability to focus and remain on task while utilizing good organizational skills.

- Ability to work independently and as an effective member of various teams essential.

- Ability to communicate with developers and external customers at a professional level.
